INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)

International application No.

PCT/DK2005/000046

1 STATE OF THE ART

Reference is made to the following documents:

D1: US-A-5 533 165 (BURRIS ET AL) 2 July 1996 (1996-07-02)

2 NOVELTY (Article 33(1) and (2) PCT)

2.1 The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (the references in parentheses applying to this document):

A connector box (3) adapted to be partly embedded in a composite structure within an aircraft of a wind turbine, where said connector box (3) comprises a base part (20) and a sealing part (80), where said sealing part (80) seals off and protects a compartment (103) between the sealing part (80) and the base part (20) during manufacture of said composite structure, and which sealing part (80) can be removed after manufacture making said compartment (103) accessible, and where said base part (20) is adapted to fasten the connector box (3) in the composite structure by having a larger circumference near its bottom than near its top.

The subject-matter of claim 1 differs from this known connector box in that the sealing part is a **sealing bag**.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

2.2 The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claim 11, which therefore is also considered new (Article 33(2) PCT).

2.3 Claims 2-10 and 12 are dependent on claims 1 and 11 respectively and as such also meet the requirement of novelty (Article 33(2) PCT).

3 INVENTIVE STEP (Article 33(1) and (3) PCT)

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY

PCT/DK2005/000046

- 3.1 The problem to be solved by the present invention may be regarded as providing a connector box to be embedded in a fiber-reinforced part which is capable both of effectively protecting any sensitive elements in its interior and keeping resin out during manufacture and of giving simple access to its interior after manufacture.
- 3.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step for the following reasons:
- 3.3 A sealing bag is neither indicated nor hinted to in the document D1. Therefore it is not obvious for the skilled person in the art faced with the above mentioned problem and having regarded the disclosure of D1 to come up to the solution according to claim 1.
- 3.4 The subject-matter of claim 1 is therefore inventive (Article 33(3) PCT).
- 3.5 The same reasoning applies, mutatis mutandis, to the corresponding independent claim 11, which therefore is also considered to be inventive (Article 33(3) PCT).
- 3.6 Claims 2-10 and 12 are dependent on claims 1 and 11 respectively and as such also meet the requirements of the PCT with respect to inventive step (Article 33(3) PCT).
